

Guillotine

dampertechnology.com/dampers/guillotine/

DTL Guillotine dampers and blanking plates can be used in any application where a positive isolation is required for routine maintenance and/or entry to a duct behind a media source.

Our guillotine designs have a record of proven reliability on major UK and overseas power stations as well as offshore installations. Actuation can be manual, pneumatic, hydraulic or electric, with various designs to suit all budgets and specifications.
